Education

GC University Faisalabad
BS (Computer Science)
CGPA 3.4 / 4

Skills

- Angular | Vibe Coding |
- TypeScript | JavaScript | NGRX
- Signalr } ERP | CRM | Wireframe
- SCSS | Tailwind | PSD to HTML
- Prime NG | Angular material
- Nestjs | Expressjs | REST APIs
- Monogodb | Monogoose | Swagger

Interests

- Outing & traveling
- Cricket, Snooker
- Internet Browsing
- Social Activity

About me

I specialize in designing, coding, and modifying websites—from layout to functionality—based on client requirements. My focus is on creating visually appealing, user-friendly, and easy-to-navigate websites. I'm eager to contribute my skills and dedication to an organization that values talent and provides growth opportunities.

Experience

- Sr. Angular Developer** **2024 - Present**
Xenex Media
Xenex Media is a creative digital agency specializing in innovative web development, UI/UX design, and custom software solutions. We help businesses grow through smart, user-focused technology and design.
- Angular Developer** **2021 - 2023**
NCRA (National Center of Robotics and Automation)
NCRA – National Center of Robotics and Automation is a cutting-edge R&D consortium in Pakistan, focused on advancing robotics, automation, and AI. With specialized labs across top universities, NCRA drives innovation, supports industrial automation, and fosters indigenous technology development.

Projects

- Angular Developer**
Real estate management system
Real Estate Management System (REMS) is an online real estate software application that manages the overall operational activities and processes, starting from the management of the property, to the management of real estate agencies, agents, clients, and financial transactions. It provides comprehensive reports for managing the Real Estate agency performance and efficiency, and enables the management for better decision- making.
- Angular Developer**
Outbreak AI
A dynamic map of North America shows red dots indicating outbreak locations. Powered by artificial intelligence and real-time data mining, HealthMap detects disease outbreaks and issues timely alerts to support rapid response and public health action.
- Angular Developer**
Warehouse Management
A warehouse management system (WMS) is a software application that helps control and manage the day-to-day operations in a warehouse. WMS software guides inventory receiving and put-away, optimizes picking and shipping of orders and advises on inventory replenishment
- Angular Developer**
640 Bourke
640 Bourke blends historic industrial context with Melbourne's future. The 68-story tower will feature floor-to-ceiling windows in 1, 2, and 3 bedroom residences, as well as four levels of residential amenity. Integral to the ground-level experience is the retention and reuse of the historical Eliza Tinsley Building.

Professional Skill

- Maintaining and improving the website speed
- Building reusable code and components for future use.
- Successful working in a team environment as well as independently
- The ability to work on multiple tasks
- The ability to work in a systematic way
- Quickly learn new things.
- Integrating third-party packages
